

Military Surface Deployment and Distribution Command

Customer and Carrier Advisory

August 25, 2023

CA-23-08-25/0059

Subject: Recovery of DoD Astray Freight in YRC's Possession

Purpose: To provide guidance to Government Cargo Recovery Effort (GOCARE) Committee Members regarding DoD astray freight located in YRC and Yellow Freight terminals.

Be Advised: With the shutdown of Yellow Inc. operations, there is a high probability YRC terminals may have DoD astray freight.

SDDC GOCARE Program Manager is advising all GOCARE Committee Members to visit Yellow terminals located within a 30-mile radius of their shipping activity to search for and recover **all** DoD astray freight. Committee members may consider visiting terminals beyond 30 miles at their discretion. This does not include non-DoD freight.

Committee Members must coordinate with YRC personnel prior to departure to ensure they can access the terminal as locations have limited hours and staffing.

GOCARE Committee Members will arrange for pickup of all discovered astray freight regardless of Service or DoD shipping activity ownership.

Committee Members should arrange for dock pickup with YRC employee(s) on site. Committee members also have the option to arrange dock pickup by emailing government.solutions@myyellow.com. All email requests must come from a ".mil" address. Please see SDDC Customer Advisories CA-23-07-26/0053 and its subsequent updates for additional information.

GOCARE Chairpersons and the Military Services are encouraged to provide additional guidance to their Committee Members related to costs associated with travel to the YRC terminals and additional transportation costs for astray freight.
