

Military Surface Deployment and Distribution Command

Customer and Carrier Advisory

April 14, 2025

CA-25-04-14/0020

Subject: Global Freight Management (GFM) Lift Gate Implementation

Purpose: Inform Transportation Officers (TOs), Installation Transportation Office (ITO) and Transportation Service Providers (TSP) about the recent system change concerning the Lift Gate accessorial.

Be Advised: The GFM Program Management Office recently implemented the Lift Gate accessorial within all system applications. The following changes will allow the following:

Transportation Officers now have the ability to select the Lift Gate accessorial (LFG) when constructing shipments in the Freight Acquisition Shipping Tool, Spot Bid, and the Defense Freight Transportation System application. Commercial carriers can also select the Lift Gate accessorial when building tenders in the Tender Entry on the Web application.

The MFTURP-1 will be updated to include LFG; release date to be determined.
