

**Military Surface Deployment and Distribution Command**

**Customer and Carrier Advisory**

**December 10, 2024**

**CA-24-12-10/0072**

**Subject:** Transportation Service Provider Operations Security Incidents

**Purpose:** To inform Department of Defense (DoD) installations and Transportation Offices (TO) of operations security (OPSEC) concerns regarding truck drivers posting videos of tactics, techniques, and procedures.

**Be Advised:** Transportation Service Providers (TSP) have been posting videos on social media platforms recording tactics, techniques, and procedures of military personnel as well as routes and coordinates of military installations. So far, there have been four installations affected by the incidents. Posting videos of this nature are considered OPSEC violations as they potentially reveal sensitive transportation information.

Incidents should be reported to the affected installation's security manager and to SDDC's Carrier Performance Mailbox.
