Customer and Carrier Advisory

January 4, 2023

CA-23-01-10/0004

Subject: Updates to the SDDC Public Website to Facilitate the Search of Advisories

Purpose: To inform Customers & Transportation Service Providers (TSPs) that Advisories will be categorized by topic, as well as by calendar year, on the Public Website.

Be Advised: Information assurance and cyber security policies prevent the "Search" function on the SDDC website from working properly. As such, users have been unable to search for Customer Advisories using the "Search this site" application on the site.

On average, SDDC publishes more than 125 Customer Advisories each year. To make locating specific advisories easier, the Advisory team will begin categorizing advisories by topic on the Public Website.

Effective immediately, advisories will be posted by category as well as by calendar year as has been past practice. Requestors will be required to identify the category upon submission for publication to the SDDC Customer Advisory group box. The category will be included in the published advisory.

Categories include:

- AIR
- BARGE/OCEAN
- COMBATANT COMMANDS (separate category for each)
- CONTAINERS
- CUSTOMS
- DTR/MFTURP-1/POLICY
- FOREIGN MILITARY SALES (FMS)
- GENERAL INFORMATION
- MOTOR
- RAIL
- SYSTEMS
- TRAINING
- TRANSPORTATION PROTECTIVE SERVICES (TPS), ARMS, AMMUNITION & EXPLOSIVES (AA&E) and HAZMAT

Please contact the G3 Advisory team at the email address listed below if additional categories are needed.

Requestors can visit <https://www.sddc.army.mil/advisories/Pages/CCA.aspx> for a sample advisory that may be used as a template. Advisory requests should be submitted to the Advisory team at usarmy.scott.sddc.mbx.g35-advisory-team@army.mil.

Note: Advisories that contain PII and/or CUI (FOUO) information WILL NOT be published until this information has been removed. Requestors should use group telephone lines or group email boxes for contact information. When submitting an advisory, please annotate in the submission email that the document does not include PII/CUI. There is no need to include this statement in the advisory itself.
