

Military Surface Deployment and Distribution Command

Customer and Carrier Advisory

May 13, 2024

CA-24-05-13/0031

Subject: Global Air Transportation Executions System (GATES) Customs 302 forms

Purpose: To inform users of improvements to the Customs 302 forms and functionalities.

Be Advised: GATES (Surface) has undergone significant improvements regarding Customs 302 forms and functionalities. These enhancements include:

1. Addition of an email column to the Water Data Management-Stamp Holders page.
2. Introduction of an email column to the Water Customs-Table Setup page under the Transporter Code tab.
3. Incorporation of configuration for PDF printing to the Water Customs-Table Setup page, specifically under the Water Customs Setup tab.
4. Serial Number fields now operate in read-only mode upon PDF printing configuration, initially appearing blank.
5. Selection of a stamp holder automatically populates fields with corresponding information.
6. Introduction of digital signature capability for Customs 302 forms.
7. Capability to email forms directly.

These upgrades aim to minimize errors and streamline the preparation and printing process of Customs 302 forms. Users possessing the appropriate GATES role will have access to these enhancements within the customs area. Additionally, users retain the option to print customs documentation and affix a wet signature on all forms; instead of utilizing the new digital-signature feature.
