

Military Surface Deployment and Distribution Command

Customer and Carrier Advisory

June 05, 2023

CA-23-06-05/0042

Subject: SDDC New Public Facing Website Launch

Purpose: To inform Department of Defense shippers of new resource available to assist with shipment planning.

Be Advised: SDDC G-6 has created a new public facing website to assist DoD carriers and shippers. Users will find improved usability and access to Customer Carrier Advisories, various systems, and programs, as well as other items utilized by our industry partners and customers. The URL that you are currently using will not change. You will see additional choices along the top menu and can locate needed information based on the mode you are utilizing. Access to all items needed by a mode will be found on that mode's page. A new contact list has been created giving quick access to our SDDC personnel. Additionally, access to important programs and program information is located on each mode page and in the site's footer.

POC: G-6, Knowledge Management Office,
