

**United States Transportation Command  
Customer Advisory  
26 September 2024  
USTC-CA-00078**

**Subject:** Small Packages thru APOE Travis AFB via AMC Channel Missions

**Purpose:** Advise shippers on requirement for movement of eligible small packages destined to Pacific locations to include Alaska and Hawaii.

**Be Advised:** Travis AFB receiving approximately 11, 000 shipments of small packages per month. Due to high volumes of cargo delivered to Travis AFB and on-going construction to the freight terminal, reducing floor space, Air Mobility Command is reminding all transportation offices and shippers to not ship international small packages under 50 lbs. (except those that require special handling) for onward movement in the AMC channel. Shipping small packages via AMC channel creates an unnecessary backlog at Travis AFB, and in-turn delays movement of all DoD cargo.

**POC:** AMC/A4TC, DSN 779-4434/Commercial 618-229-4434, [amc.a4tcp@us.af.mil](mailto:amc.a4tcp@us.af.mil)

**Expiration:** 31 October 2025.

**Category:** General Information
