Palletizing Code J UB Shipments

Port agents will consolidate Code J shipments into pallet loads. This will be accomplished with 463L pallets and plastic covers supplied by the AMC air terminals. All pallets must be configured for DC-8 or DC-10 aircraft. Shipments belonging to different carriers may be placed on the same pallet, provided these carriers use the same port agent at the POD. These will be identified as pure pallets. Shipments belonging to several carriers that use different agents at the POD may be placed on the same pallet when there is insufficient tonnage to build pure pallets. These will be identified as mixed pallets. All pallets will have a placard identifying them as pure or mixed in accordance with Appendix 11A. When there is not sufficient tonnage to build pure or mixed pallets, port agents may deliver loose shipments in order to ensure delivery is accomplished on the RPDD. Intertheater Code J shipments will be delivered to the aerial port loose and not be commingled (palletized) with shipments having a final destination in CONUS.

Port agents will place a copy of the TCMD in a packing envelope, which will be attached to the pallet in such a manner as to be accessible to AMC personnel. The port agent will provide TCMD information on computer diskette(s) to the origin AMC air terminal in a format capable of interfacing with current transportation automated information systems.
