

Military Surface Deployment and Distribution
Customer/Carrier Advisory
June 24, 2016
CA-16-06/24-0063

Subject: Transporting F24 Jet Fuel from Defense Fuel Support Point (DFSP) Selby, CA

Purpose: Provide guidance to advise Transportation Service Providers (TSPs) of the requirement for dedicated jet fuel (F24) trucks at DFSP Selby, CA.

Be Advised: TSPs transporting jet fuel, commodity code 99991514, from DFSP Selby, CA (SPLC 876142270) must use equipment types (AT1 or AT2) dedicated to jet fuel service only.

Individual trucks will not be inspected nor tested at DFSP Selby; however the product will be tested and certified prior to loading. If the fuel delivered to receiving activity does not meet the quality requirements and the cause cannot be traced back to the loading activity, then the TSPs will be held responsible for contamination. The TSP will be required to reimburse DLA Energy for the actual value of the product. The exception is when contamination/damage to bulk petroleum cargo is due to a force majeure situation.

DLA Energy POC: Questions concerning this advisory should be addressed to: dlaenergytrans@dla.mil
