

SDDC-PP Advisory 15-0092

Date: 15 May 2015

From: AMSSD-PP Scott AFB, IL 62225

To: All Military Service Headquarters Representatives, Worldwide Personal Property Shipping Offices (PPSOs) and Department of Defense Approved Transportation Service Providers (TSPs)

Subject: Expansion of the Short Fuse Window for the 2015 Peak Season

1. After discussions with the Services, SDDC has set the expansion of the short fuse days to start on **18 May 2015**. This change is being done to offset the increased number of blackouts and the PPSO inability to book shipments on certain channels.
2. The expansion means that shipments offered with requested pick up dates of **10 government business days** (GBDs) or less will now be considered short fuse and offered through the short fuse process. On **1 June 2015, SDDC will** change the short fuse days from 10 days back to 5 days.
3. SDDC, in conjunction with the PPSOs, will monitor blackouts during this period and reserves the right to shorten or extend the expanded short fuse period as required to best support the DP3. Please ensure widest dissemination within your organizations, so all key personnel are aware of the updated adjustment.
4. TSPs are reminded that the short fuse shipment lock is five (5) minutes maximum per shipment--time allotted to determine pickup criteria (e.g., agent capacity, linehaul capacity, etc.). Any user, software overlay, and/or device that causes a short fuse shipment to lock beyond five (5) minutes will be prevented from accessing the short fuse page until proof of corrective action is taken.
5. Please send any questions or concerns you may have reference this message to the Operations Team at army.sddc.safb.pops@mail.mil.
6. This message is approved for release by Lt Col Michael Erhardt, Director, Personal Property, HQ SDDC.
