

SDDC-PP Advisory 16-0011

Date: 29 October 2015

From: HQ Scott AFB, IL

To: Military Service Headquarters Representatives, Worldwide Personal Property Shipping Offices (PPSO), and Personal Property Transportation Service Providers (TSP)

Subject: Deployment of Defense Personal Property System (DPS) Scheduled Outage

1. DPS will be unavailable Friday, 30 October 2015 between 21:00 hours Central Daylight Time (CDT) and 02:00 hours CDT Saturday, 31 October 2015. This four-hour outage is required to implement DPS release 2.6.0 into production. Release content includes “quick fixes” to the Claims web pages; remediation of Rate Filing Workbench upload capabilities for TSPs, which experienced significant performance issues in the January 2015 DPS v2.0.0 release; and a maintenance release to remediate various defects across multiple modules.

2. An explanation of the DPS v2.6.0 content and fixes follow:

a. SPR 6718 – DPS is no longer showing the applicable state abbreviation according to the destination rate area. Fix: modified to add the correct state abbreviation for OCONUS to CONUS shipments.

b. SPR 6751 - DPS Analytics' Pre-pickup fields do match block 18/19 info from the pre-pickup screen. Fix: modified the traced column for Analytics to the correct pre-pickup fields within the PERSROP database.

c. SPR 6758 - Block 13 of the DD Form 1384 is being populated with a 6 digit date (i.e. '245600') instead of the 3 digit Julian date (i.e. '074'). Fix: changed code in DD1384FormDataCollector.java to use DateFormatter.

d. SPR 6760 - The domestic PPSO tab's list of responsible GBLOCs is showing previously deleted Responsible GBLOCs. Fix: modified the SQL query to not return GBLOC AORs that have a status of legacy.

e. SPR 6777 - The Invoicing & Approvals module does not allow for changes that are made to the rows per page drop down to be carried from page to page. Fix: modified to correctly update the variables that control the paging, within the session whenever changes are made to the page.

f. SPR 6778 - TSPs are capable of modifying a claim item that has been settled. When the claim item is modified, the status will be changed to “Offer Pending”.

Fix: When Claim Item's Status field Item Status = Settled ---> Demand/Offer's New button is disabled. This will prevent ANY user from creating another Demand/Offer if a Claim Item's Status = Settled.

g. SPR 6795 - Whenever an inspection is entered for a shipment and the user is returned to the inspection queue the original filter criteria is still being applied to the search results. Fix: cleared the filter criteria for Origin and Destination.

h. SPR 7007 - Currently the system only allows access to market type suspensions (Market or Market-GBLOC) for SDDC Users. Fix: modified code to allow for the viewing and rescinding of Market-GBLOC type suspensions.

i. SPR 7051- DPS Analytics, subject area DPS Statistically Valid is not populating data as it should. Fix: revised the date fields to be populated as part of the Statistically Valid job.

j. SPR 7388 - Unable to load the rate filing workbench and core errors. Fix: corrected the issues by implementing true paging for the workbench that only requires the system to return a small subset of records for each page of the system.

k. SPR 7257 - Results are disappearing when using the Page Navigation hyperlinks and buttons for Tracking. Fix: modified to remove a line of code that was causing the search results to be cleared.

l. SPR 7262 SCAC Validation Menu dropdown displays Export... and Apply twice. Fix: Inactivated the duplicate objects in the Siebel Tools.

m. SPR 7267 In the Claims module, the Menu dropdown has extra/duplicate entries. Fix: Inactivated the duplicate objects in the Siebel Tools.

n. SPR 7270 In the DPS Tracking module, after clicking on TOPS under Shipping, when selecting the red bars (errors) on the Daily Shipment Transactions by Status the application does not display the shipments. Fix: Database fix was required to display error bars correctly.

o. SCR 7291 Claim Homepage Re-design. Fixes:

- 1) Updated the verbiage under the "Welcome to your claims home page" section on the left side of the claims home page.
- 2) Removed all content on the right hand side of the Claims home page, this included the following: Claims Services section, Create Claims, section, Search Claims section, and View Links.
- 3) Added a large button labeled "Start My Loss and Damage Report" for the DOD Customer to begin the process of creating a Loss and Damage Report.

- 4) Added a link labeled "View My Loss and Damage Report" for the DOD Customer to View existing Loss and Damage Reports.
- 5) Added a large button labeled "Start My Claim" for the DOD Customer to begin the process of creating a Claim.
- 6) Added a link labeled "View My Claim" for the DOD Customer to View their existing claims.
- 7) Increased the size of the HELP button.

Changes to "Claims Information":

- 1) Changed the default value to "NO" for the " Quick Claims Payment made".
- 2) Removed the save button at the top of the page.
- 3) Removed the cancel button at the top of the page.

p. SPR 7472 DD Form 1252 is not populating for shipments to Hawaii. Fix: Modified to allow for DD Form 1252 to be displayed for OCONUS to CONUS shipments with a destination of Hawaii.
