

SDDC PP Advisory # 16-0088

Date: 08 April 2016

From: HQ Scott AFB, IL

To: Military Service Headquarters Representatives, Worldwide Personal Property Shipping Offices (PPSO), and Personal Property Transportation Service Providers (TSP)

Subject: Installation of Defense Personal Property System (DPS) Releases v3.2.0 and v3.3.0

Ref: SDDC-PP Advisory # 16-0086, Defense Personal Property System (DPS) Residual Performance Issues from Release v3.1.1

1. This is a coordinated message between HQ SDDC and the DPS Program Management Office (DPS PMO). Please ensure widest dissemination to all DPS users by forwarding this advisory as appropriate.
2. As socialization for today's 3.2.0 implementation: This release involves inserting a new server into the environment and moving the Oracle Business Intelligence (OBI) component from the Analytics server to the new server. These actions will improve long-standing performance issues on the Analytics server.
3. NOTE: The DPS v3.2.0 release does not include any software code changes. The server activity stated in the previous paragraph has no relationship with the ongoing system issues. This release does not require an outage—the new server is pre-staged, configured, and will simply be connected to the network this afternoon. (This action was previously completed in the Government Test and Training environments.)
4. The DPS v3.3.0 release provides the User Management and Access Control Architecture Improvement in the new webMethods environment. This release was planned for 15 April 2016, but is deferred until the ongoing issues listed in SDDC-PP Advisory #16-0086 are resolved. The DPS PMO is planning an emergency release to remediate the ongoing performance issues; SDDC will publish a new advisory once that release date is established.
