

FORT STEWART, GA TO PORT OF SAVANNAH, GA

POWER PROJECTION PLATFORM (PPP) ROUTE

10 May 2022

BACKGROUND: Power Projection Platforms (PPPs) are defined as military installations that strategically deploy one or more high-priority active component brigade and/or mobilize and deploy high-priority reserve component units. Increased deployment activity requiring a fast and coordinated response has become the normal operational standard within the continental United States. Routes between PPP installations and their designated Air and Sea Ports of Embarkation (APOEs/ SPOEs) are termed PPP Routes. PPP Routes, a subset of the STRategic Highway NETWORK (STRAHNET), are the most critical 5,000 miles of public roadways for supporting the safe, rapid, and efficient movement of DoD personnel and equipment. Highways for National Defense (HND) mission requirements call for ensuring PPP Routes are maintained at a capable design, performance, and condition standard to support national emergency deployments.

INSTALLATION: Fort Stewart is located in southeast Georgia and is considered the Army's premier PPP on the East Coast. The installation is comprised of approximately 280,000 acres and is one of the largest employers in Coastal Georgia with over 25,500 people. Fort Stewart's primary SPOE is the Port of Savannah, and its primary APOE is Hunter Army Airfield (HAAF).
