

# JOINT BASE McGUIRE-DIX-LAKEHURST, NJ TO PORT OF PHILADELPHIA, PA

## POWER PROJECTION PLATFORM (PPP) ROUTE

11 May 2022

**BACKGROUND:** Power Projection Platforms (PPPs) are defined as military installations that strategically deploy one or more high-priority active component brigade and/or mobilize and deploy high-priority reserve component units. Increased deployment activity requiring a fast and coordinated response has become the normal operational standard within the continental United States. Routes between PPP installations and their designated Air and Sea Ports of Embarkation (APOEs/ SPOEs) are termed PPP Routes. PPP Routes, a subset of the STRategic Highway NETwork (STRAHNET), are the most critical 5,000 miles of public roadways for supporting the safe, rapid, and efficient movement of DoD personnel and equipment. Highways for National Defense (HND) mission requirements call for ensuring PPP Routes are maintained at a capable design, performance, and condition standard to support national emergency deployments.

**INSTALLATION:** Joint Base McGuire-Dix-Lakehurst (JBMDL) is located 18 miles southeast of Trenton, New Jersey on 42,000 contiguous acres. More than 42,000 individuals live and work on and around the base making JBMDL the largest employer in southern New Jersey. The installation's primary SPOE is the Port of Philadelphia, with two militarily-available terminals; Tioga Marine Terminal (TMT) and Packer Avenue Marine Terminal (PAMT).
