1 Soldier Way
Scott AFB, IL 62225

**Your eye on military logistics
and transportation security.**

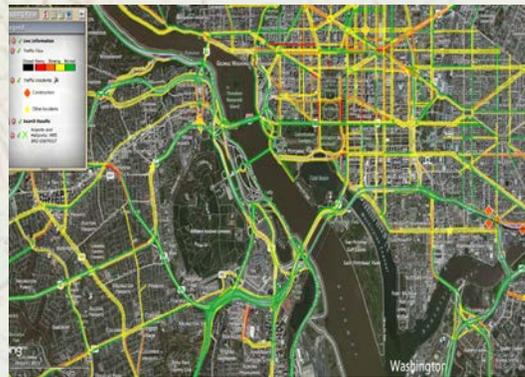

PROVIDING ACCESS TO:

- ArcGIS mapping engine, satellite imagery
- Quick Searching with categorized results
- Fast map browsing with tile map caching
- Near real-time worldwide shipment tracking
- Over 850 GIS infrastructure data layers
- Real-time weather information
- Real-time traffic & road conditions
- Deployment infrastructure data for seaports worldwide

IRRIS® technology is a web-based portal assisting the military Surface Deployment and Distribution Command – Transportation Engineering Agency (SDDC-TEA) in its core mission to improve the global deployment of US Armed forces in support of the national military strategy. On a daily basis, SDDC-TEA uses technology to effectively manage, document, and synchronize the movement of cargo, transported over land and sea, throughout the world.

Washington / Arlington
Interstate & Highway Status, with Traffic Incidents

IRRIS® serves to integrate transportation logistics, real-time tracking, and infrastructure data into a single, secure application accessible through the internet.

With real-time and relevant information about road conditions, construction, incidents, and weather from more than 850 worldwide GIS data sets, **IRRIS®** enables SDDC-TEA to visualize assets and perform spatial queries and analysis, such as rail search criteria to depict CONUS Power Projection Platforms at various installations.
